Devesh Sonpure

Senior / Principal Technical Product Manager | Enterprise & AI-
Enabled Platforms | Risk, Governance & Compliance | IIM Indore
Tampa, Florida, United States

Summary

I am a senior product leader with 19+ years of experience building and scaling large enterprise platforms across banking, risk, governance, and compliance domains. Over the years, I have owned end-to-end product strategy and execution for mission-critical systems in highly regulated environments, working closely with senior stakeholders, engineering, data, and risk teams. My core strength lies in combining strong product judgment with execution discipline—translating complex business and regulatory requirements into scalable, reliable, and user-centric platforms. I have led global teams, managed multi-product roadmaps, and delivered predictable outcomes across large, distributed organizations.

More recently, I have been intentionally transitioning into AI-enabled product management. I have built and deployed Generative AI prototypes end to end and am actively upskilling in Generative AI and Agentic AI, with a focus on applying these technologies responsibly within real-world enterprise workflows. My interest lies in using AI to augment decision-making, improve operational efficiency, and enhance user productivity—without compromising trust, governance, or reliability.

I am particularly interested in roles where AI is embedded into enterprise platforms, such as risk management, compliance, operations, and data-driven decision systems.

If you are building enterprise or platform products—especially those integrating AI in regulated or high stakes environments—I would be happy to connect.

Experience

Virtusa

9 years 9 months

Technical Product Manager / Product Owner - ERMS & Breach Management Platforms

August 2022 - Present (3 years 5 months)

Tampa, Florida, United States

Own product strategy, roadmap, and delivery for Enterprise Risk Metric System and breach management platforms supporting regulatory, governance, and risk requirements.

Partner closely with engineering, data, risk, policy, security, and UX teams to translate complex regulatory and business needs into scalable, enterprise-grade platform capabilities.

Lead backlog prioritisation across multiple scrum teams, balancing regulatory commitments, technical constraints, and long-term platform scalability.

Took the platform from concept to global rollout, achieving 99% adherence to incident and breach resolution SLAs across regions.

Drive user acceptance testing, change management, and stakeholder alignment to ensure smooth adoption and sustained usage.

Product / Platform Lead – Retail Basel & Risk Data Platforms | Citi Bank (via Virtusa)

April 2019 - July 2022 (3 years 4 months)

Pune, Maharashtra, India

Led re-engineering of Retail Basel platforms across mortgages, cards, and loan products in a regulated banking environment.

Defined a data and platform roadmap to improve governance and reporting accuracy, reducing data discrepancies by 40%.

Worked closely with risk and analytics teams to ensure accurate implementation of complex regulatory rules and data models.

Program & Platform Delivery Lead – RPA & Digital Transformation | Citi Bank (via Virtusa)

April 2017 - March 2019 (2 years)

Pune, Maharashtra, India

Built and scaled a 100+ member global delivery organisation for enterprise automation initiatives.

Led delivery and governance of 40+ RPA bots across regions, improving operational efficiency and quality.

Designed a Jira-based execution framework to improve transparency and predictability.

Technical Product Manager – Digital E-Commerce Platform Vodafone (via Virtusa)

April 2016 - March 2017 (1 year)

Hyderabad, Telangana, India

Owned product delivery for a digital e-commerce platform serving commercial customers.

Drove responsive, omni-channel product enhancements contributing to a projected 35% revenue uplift.

NTT Data Corporation

Assistant Project Manager – NTT DATA

January 2011 - April 2015 (4 years 4 months)

Hyderabad Area, India

Led BA and QA teams supporting multiple enterprise applications.

Drove requirements analysis, stakeholder coordination, and delivery governance.

SHIPNET SOFTWARE SOLUTIONS INDIA PRIVATE LIMITED

Quality Analyst / Business Analyst

March 2009 - January 2011 (1 year 11 months)

Worked closely with customers on requirements and product enhancements in the logistics domain.

Accenture Services

Software Engineer

October 2006 - February 2009 (2 years 5 months)

Chennai Area, India

Supported enterprise application development, testing, and automation initiatives.
